1035-05-1296   **Thotsaporn Aek Thanatipanonda*** (`thot@math.rutgers.edu`), 208 B Rariatan Ave, Highland Park, NJ 08904. *Computer-Generated Conjectures(!) and Proofs(!!) in Combinatorial Game Theory (II).*

This will be a follow up talk to my wonderful advisor Doron Zeilberger. People like to make fun of me for playing games. But playing games is fun and helps me do math better. I will give more examples of games and show how computers can make conjectures and prove theorems about them. (Received September 19, 2007)
