1035-58-999   **David Borthwick*** (`davidb@mathcs.emory.edu`), Dept. of Math/CS, Emory University, Atlanta, GA 30322. *Upper and lower bounds on resonances for manifolds hyperbolic near infinity.*

We present some new asymptotic results for resonances in the context of complete Riemannian manifolds which are hyperbolic outside of a compact set. This work extends results that were previously known in dimension 2 or in the exactly hyperbolic case. (Received September 18, 2007)
