

1035-S1-1327 **Fusun Akman*** (akmanf@ilstu.edu). *An interactive website to help faculty incorporate applications of core mathematics courses.*

The website contains applications of topics covered in core mathematics courses that can be presented as individual/group projects or in-class worksheets, as well as suggestions of how to incorporate them into tight schedules. This idea grew out of senior portfolio obligations for future secondary education teachers: the students have to show that they have had real-life applications that satisfy NCTM/NCATE requirements.
