Hieu D Nguyen* (nguyen@rowan.edu), Rowan University, Department of Mathematics, 201 Mullica Hill Rd., Glassboro, NJ 08028, and **Thomas Osler**. *Translating Euler's works: How to get your students' feet wet in undergraduate research*. Preliminary report.

In this talk we discuss our project on recruiting Rowan undergraduate students to study and translate some of Leonard Euler's mathematical papers and describe the mentoring process involved. We reveal why this is a wonderful first experience for students who wish to engage in mathematical research and share our successes and pitfalls. (Received September 16, 2007)
