**Sándor J Kovács\*** (skovacs@uw.edu) and **Zsolt Patakfalvi**. *Subadditivity of log-Kodaira dimension.*

This is a report on joint work with Zsolt Patakfalvi. We prove several positivity results for fiber spaces whose general fiber is of log general type and use them to confirm the Iitaka-Viehweg conjecture on the subadditivity of log-Kodaira dimension. (Received September 20, 2015)
