

1145-46-2177 **Pamela I. Delgado*** (pid2@pitt.edu). *Weak Compactness and the Fixed Point Property.*

We will give a survey of various results studying the relation between weak compactness and the Fixed Point Property in different Banach Spaces. In particular we will contrast the spaces c_0 and c . In the former, weak compactness is equivalent to the Fixed Point Property, while in the latter this is no longer true. (Received September 24, 2018)
