**Gerardo R Chacon\*** (gerardo.chacon@gallaudet.edu) and **Gerardo A Chacon** (gerardoachg@uan.edu.co), , Colombia. *Examples of spaces of analytic functions with variable exponents.*

We present some examples of spaces of analytic functions related to variable exponent Lebesgue spaces  $L^{p(\cdot)}$ . We exhibit some properties of the spaces and study the influence of the exponent  $p(\cdot)$  on the behavior of functions on the space. (Received September 04, 2018)
