**Paul Fili\*** ([paul.fili@okstate.edu](mailto:paul.fili@okstate.edu)), 401 Mathematical Sciences Bldg, Oklahoma State University, Stillwater, OK 74078, and **Lukas Pottmeyer** and **Mingming Zhang**. *Iteration of Mahler's measure*. Preliminary report.

We present some new results on the stopping time of the Mahler measure as a dynamical system on algebraic numbers, extending earlier results of Dubickas. We also present some open conjectures, particularly in the wandering point case. (Received January 29, 2019)
