**Allan C. Peterson\*** (apeterso@math.unl.edu), Math. Dept., University of Nebraska-Lincoln, Lincoln, NE 685880130, and **Bevan Thompson**, Brisbane, Australia. *The Henstock–Kurzweil Delta and Nabla Integral.*

We will study the Henstock–Kurzweil delta and nabla integrals. This will enable researchers in dynamic equations on time scales to study more general dynamic equations. Many examples will be given. (Received September 27, 2005)
