Kevin E. Charlwood* (kevin.charlwood@washburn.edu), Dept. of Mathematics & Statistics, Washburn University, 1700 SW College Avenue, Topeka, KS 66621. *Growing an Actuarial Science Program into an Advanced Undergraduate Program*. Preliminary report.

Washburn University's Actuarial Science program became qualified by the Society of Actuaries (SOA) as an Advanced Undergraduate Program in 2004. We look at how this program developed in terms of curriculum to meet the demands of the changes in the SOA exam series in 2000, along with local internship opportunities for our students. We also consider administrative issues in building and maintaining the program, including budget and the recruiting of new students for the program. (Received September 14, 2005)
