Mohammad K. Azarian* (azarian@evansville.edu), Department of Mathematics, University of Evansville, 1800 Lincoln Avenue, Evansville, IN 47722. *Open Questions and Conjectures Regarding Near Frattini Subgroups of Generalized Free Products of Groups*. Preliminary report.

In this talk, first we will discuss some open questions regarding near Frattini subgroups of generalized free products of groups. Then, based on known results, we will present some conjectures concerning near Frattini subgroups of generalized free products of groups. (Received September 02, 2009)
